

USE CASE for the Blogger Project:

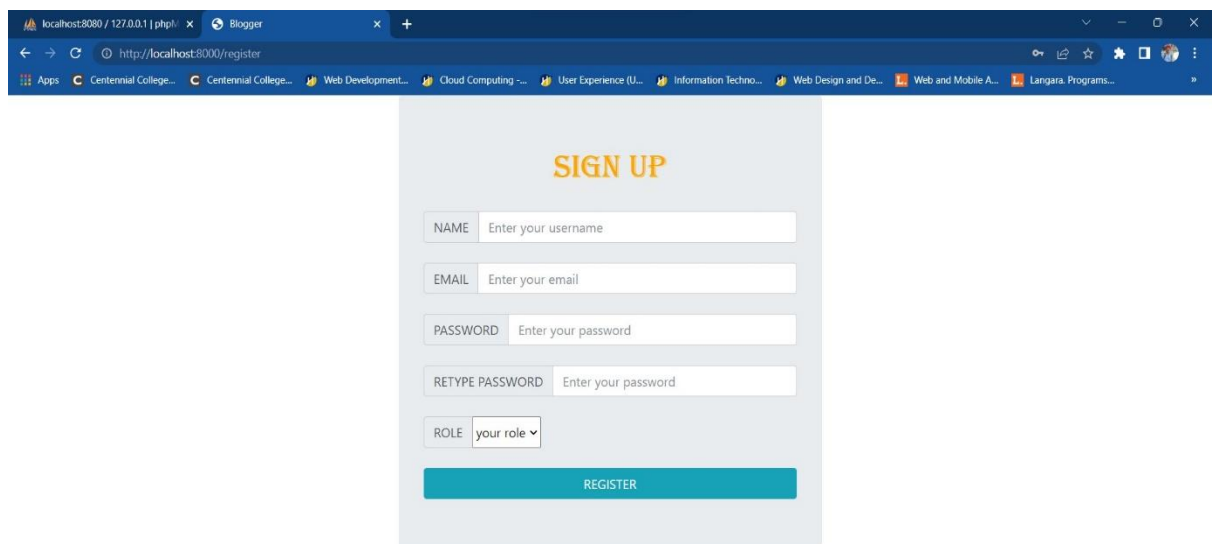

1. Home Page (without user login)

Home Page of Blogger shows you the demonstration of what the “Blogger” is about and describes its features in a nutshell.

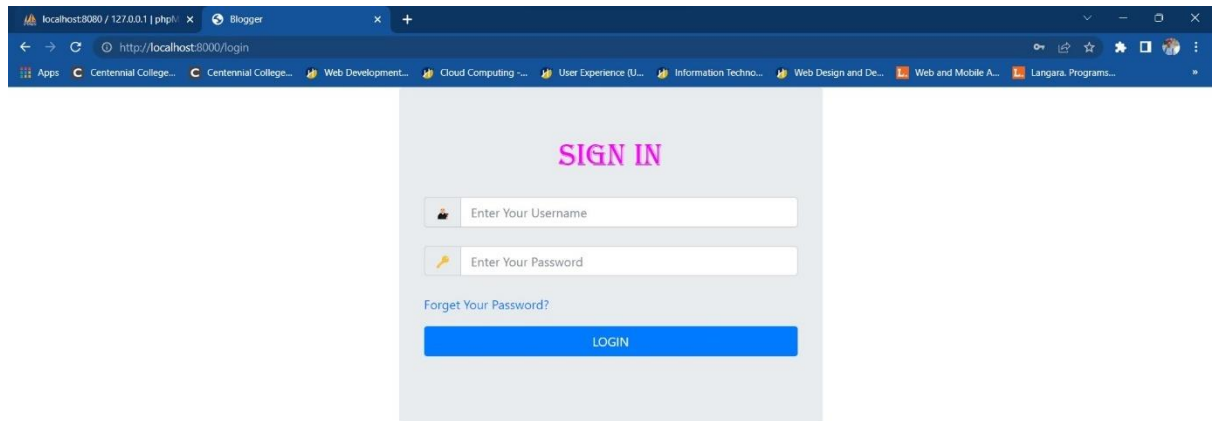

2. Sign Up Page:

Register user page or signup page can be used to register yourself to the portal and access its features. Also, you can choose your role while sign up process, that is editor, or, writer.

A screenshot of the Sign Up page in a web browser. The browser's address bar shows the URL "http://localhost:8000/register". The page has a light blue background and a white form. The form contains the following fields: NAME (with placeholder text "Enter your username"), EMAIL (with placeholder text "Enter your email"), PASSWORD (with placeholder text "Enter your password"), RETYPE PASSWORD (with placeholder text "Enter your password"), and a ROLE dropdown menu (with placeholder text "your role"). A blue REGISTER button is located at the bottom of the form.

3. Login Page (Sign-in Page):

This page helps you to login to the portal with your user credentials and also helps you to recover your password if you have forgotten after registering with your **username**.

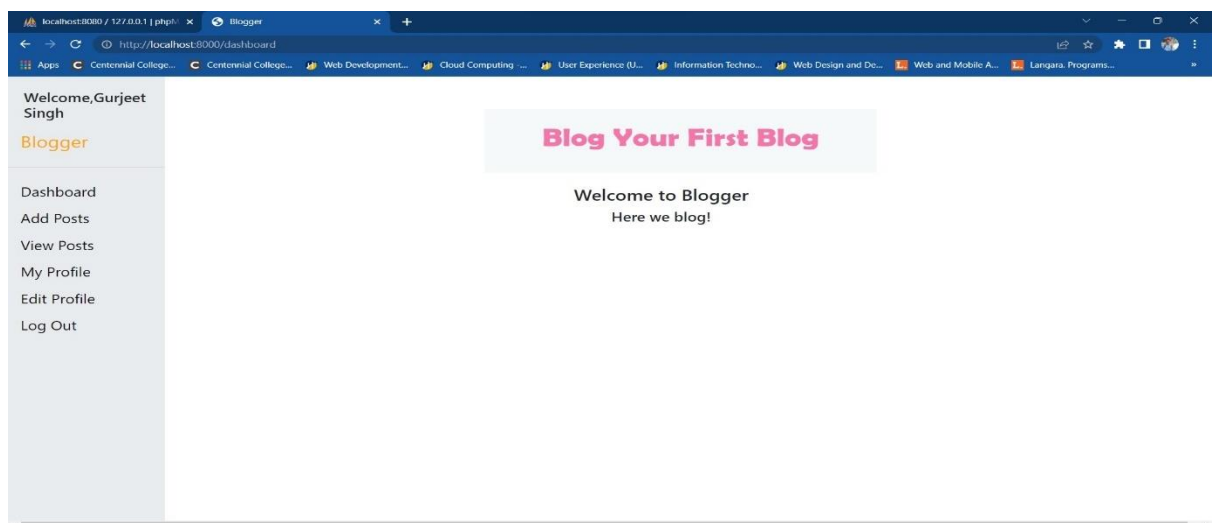

N.B Click on Forget Your Password? to recover your password if have lost it otherwise login through your credentials.

4. User Dashboard (For Writer):

There are two types of dashboards, that is, writer or editor with different access available to both of them.

Writer have features to add posts, view their own posts, edit, delete their posts, with the alteration of their profile details and reviewing all the changes.

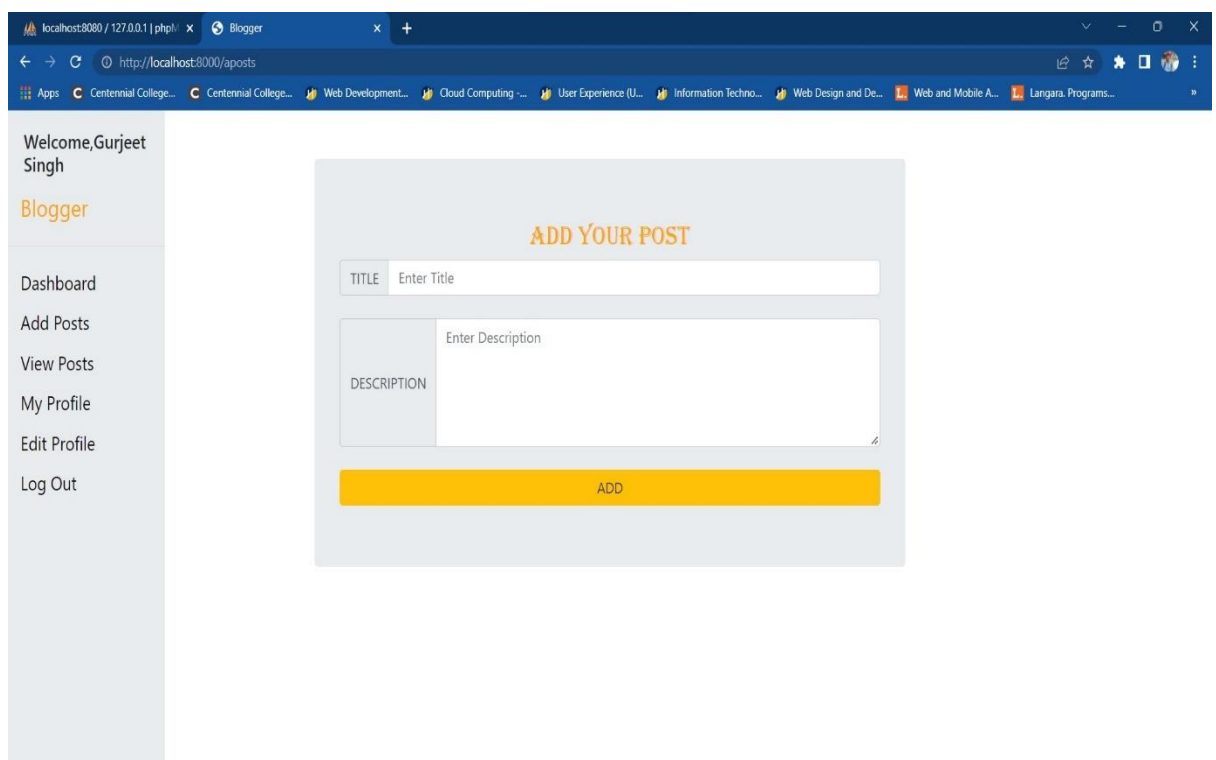

5. User Dashboard (For Editor):

Editor have features or access to all the posts that are available on the website. Some of them are: commenting on the posts of all user posts, creating and editing their profiles, even they can become writer by changing their profile roles.

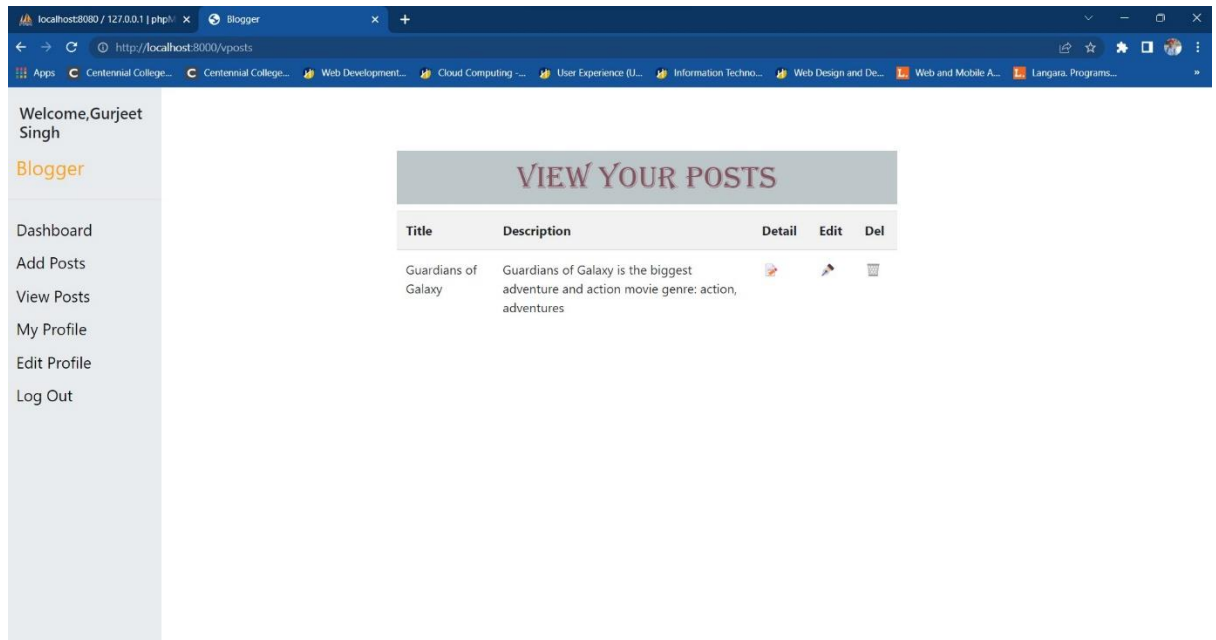

6. Add your Post page:

This page helps user to add their post by letting them use the portal. Some key factors to use are: Title, Description where you have to add your posts title and write the post in posts description, you can use your own words as there is no restriction to that.

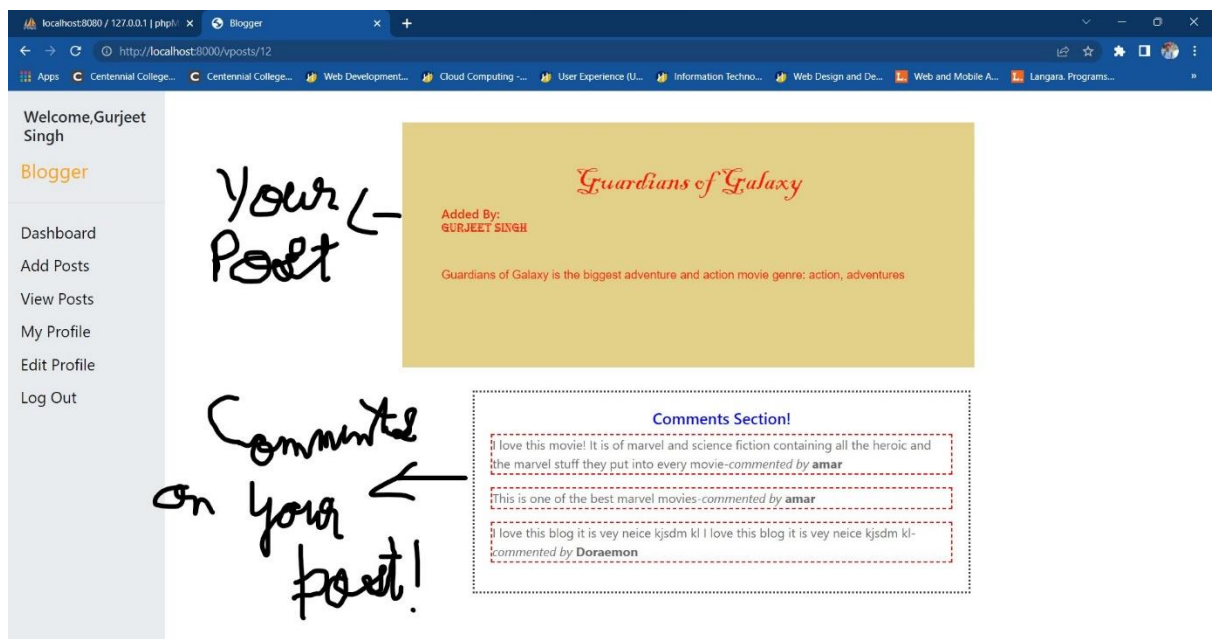

7. View Posts Page:

Users use this feature to check or see their posts and they are able to view the post summary, and, use various options like Detail, Edit, Delete for their purposes.

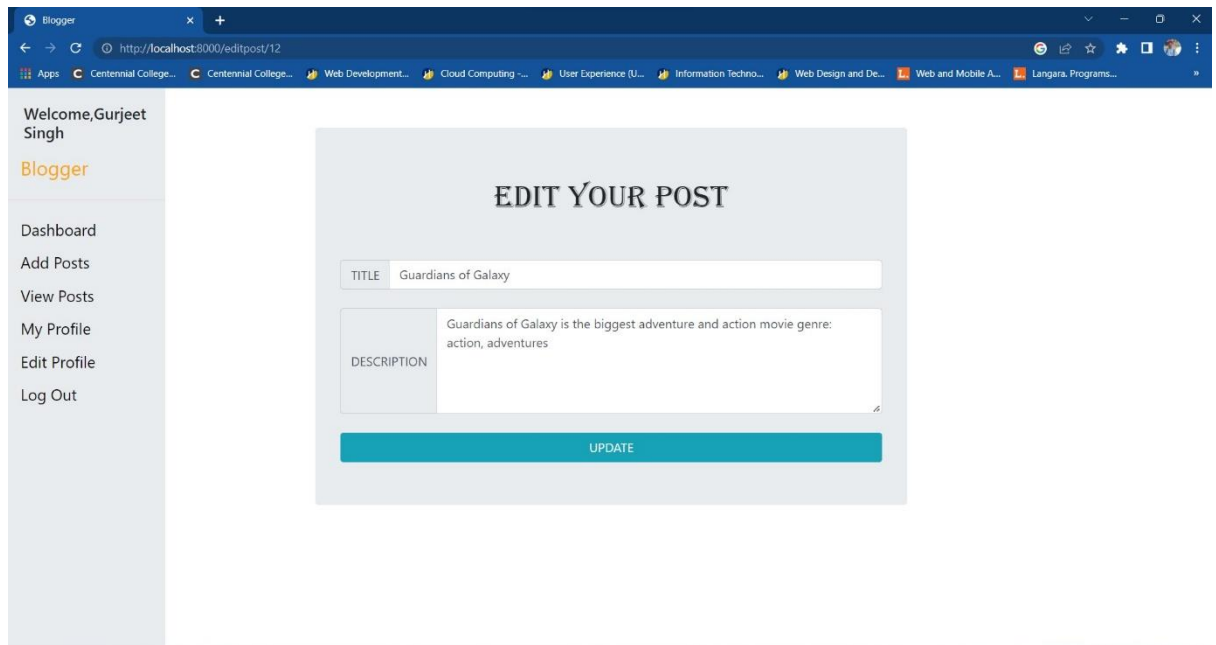

8. Detail Posts Page:

This page shows all the details of the post, like Title, Author, Description in an eye-catching design and also, helps them improve their posts by seeing the comments of other users.

9. Edit Posts Page:

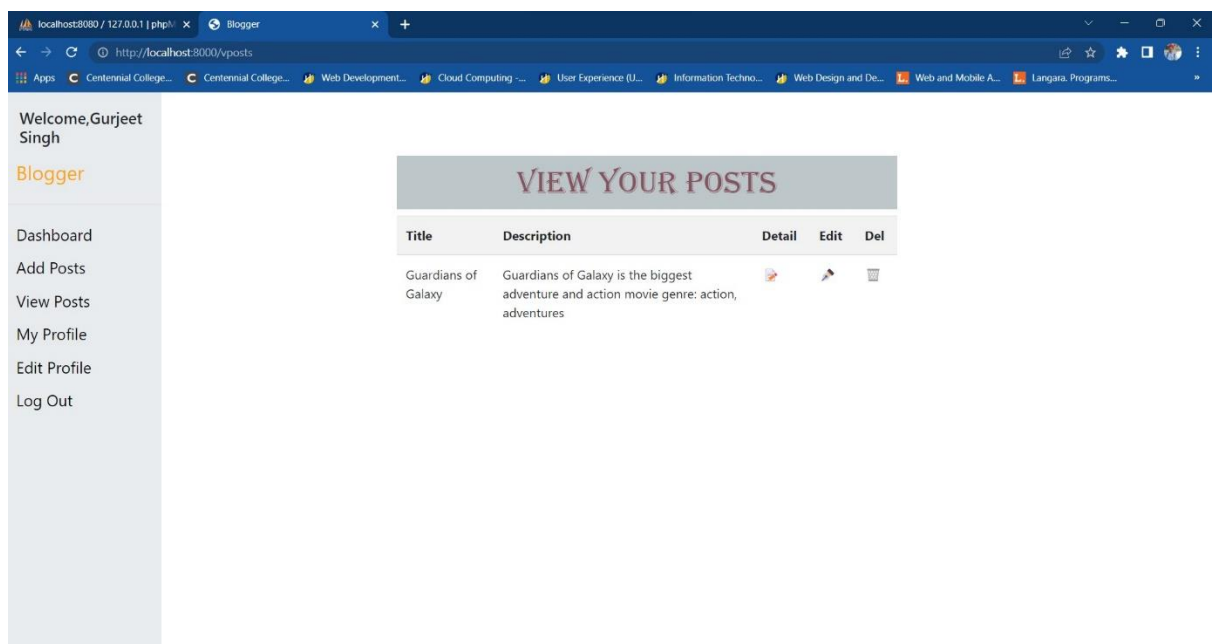

This page helps user to edit the posts details if they want to do any changes, the changes are reflected all over to the portal and helps user to improve their posts in a way that is easy to use and quick to do.

10. Delete Posts Option:

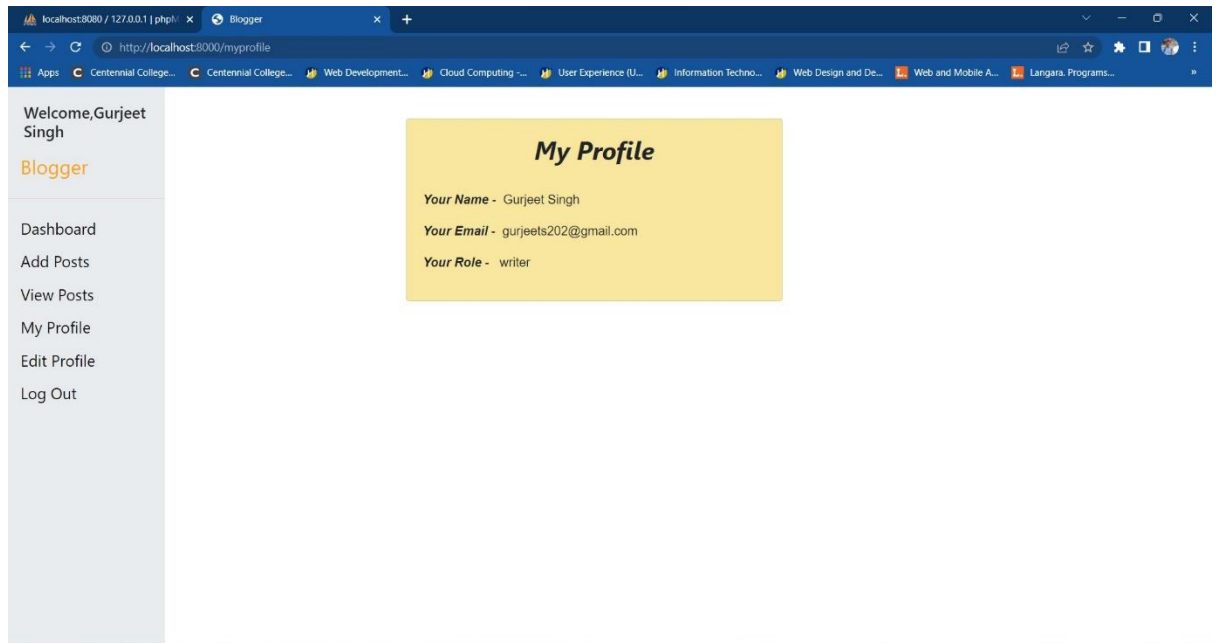

This option helps user to delete their posts. User should be careful before deleting as it will erase it once and for all after clicking on this option.

Delete Posts Option: Third right option (Del with dustbin emoji).

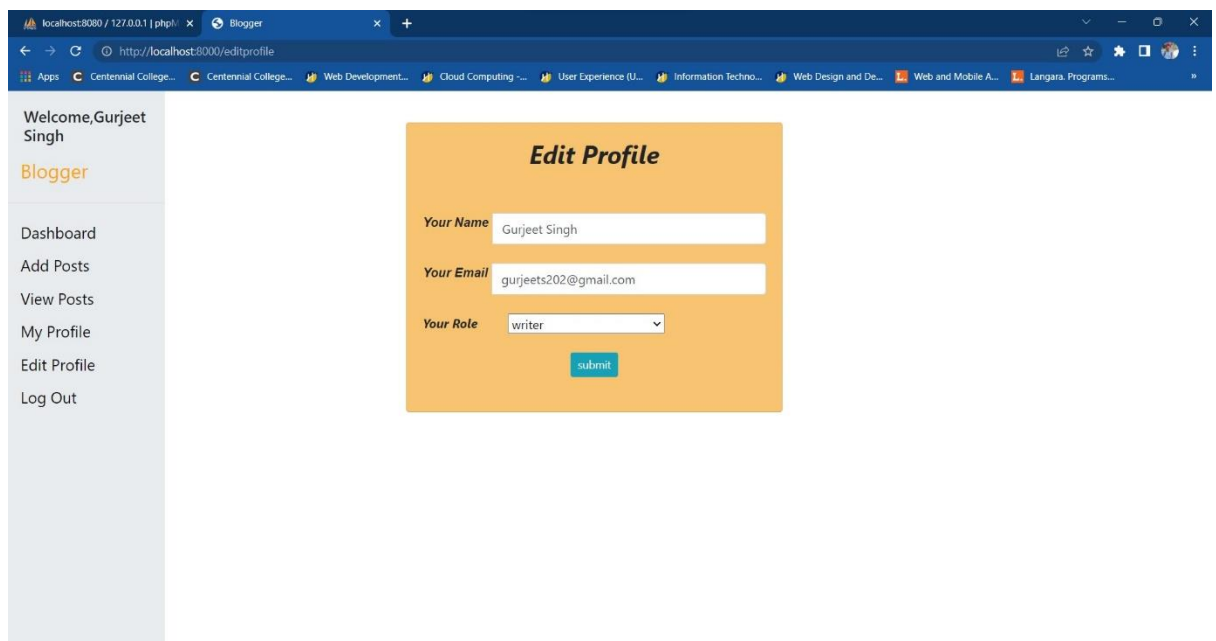

11. My Profile Page:

My Profile Page is used to check user's profile and helps them know about their credentials and role and also keep them updated with their profile.

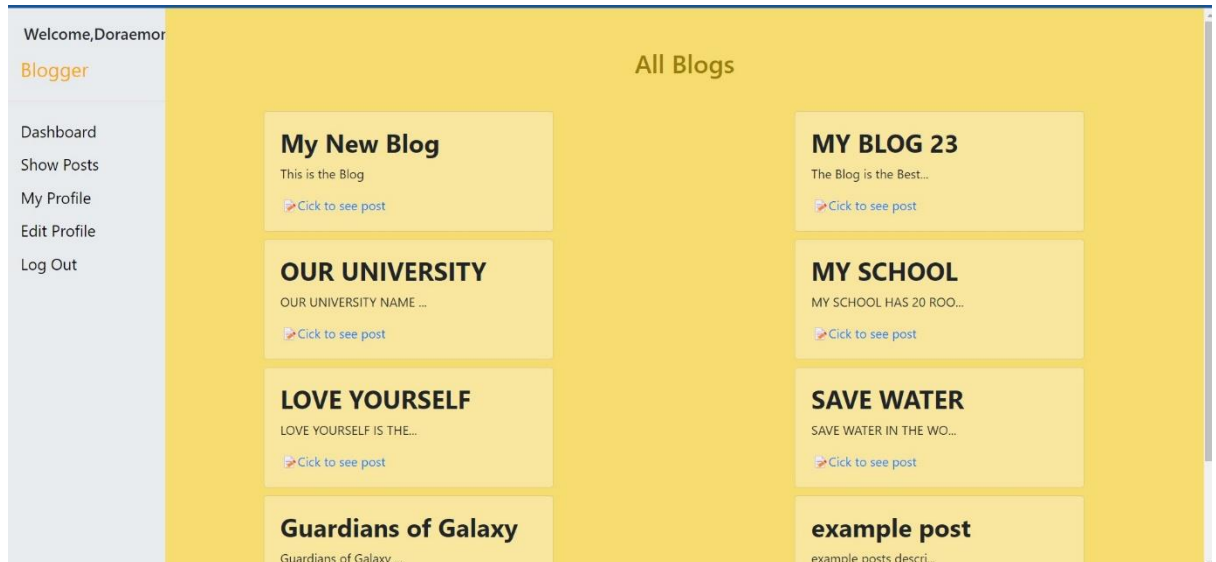

12. Edit Profile Page:

Edit Profile Page is used to edit the username, email, and their role to their choice and helps them make any changes to their profile with it.

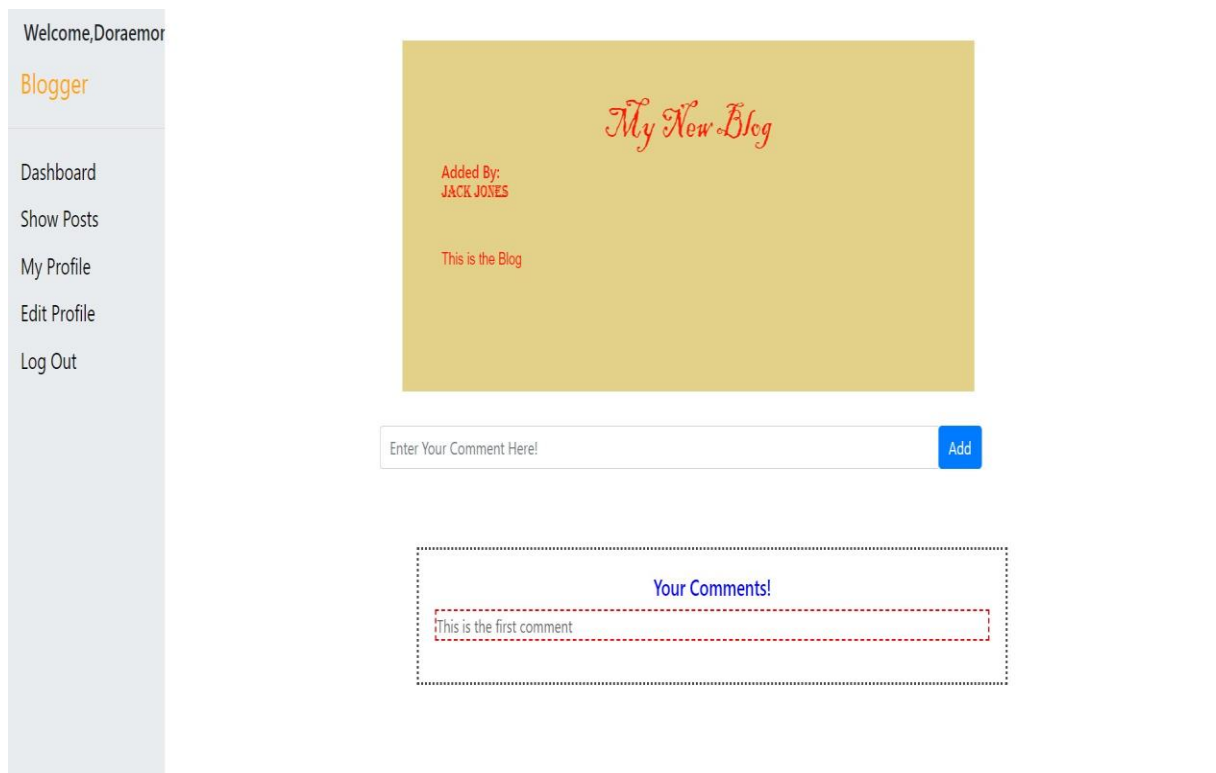

13. Show Posts Page:

This page is only for users with the editor's role, as they use this feature to check all the posts with right to comment on them.

14. View Posts Page (editor):

This page allows user with editor's role to comment on the posts and also let them read their own comments with the following view:

N.B → My Profile and Edit Profile Page are same for both the users.

→ If user change their role from writer to editor or vice-versa, they need to re- login for the changes to affect.

15. Logout Option:

Logout option helps user to logout themselves from the application and let them relog in if they want to.
